

Mexico City

CDP Cities: InFocus Report | 2016

About the report

CDP is a not-for-profit that provides the global platform for cities to measure, manage and disclose their environmental data. We work with more than 500 cities who are now measuring and disclosing environmental data on an annual basis in order to manage emissions, build resilience, and protect themselves from the growing impacts of climate change.

Thanks to CDP's cities program funder, Bloomberg Philanthropies, CDP has seen 533 cities disclose their climate change related data, a 70% increase from 2015. We congratulate the hard work and dedication of city governments in measuring and disclosing this data and for the actions they take to tackle climate change. To see the results for all participating cities, visit <https://www.cdp.net/cities>.

For the last 6 years, CDP has partnered with the C40 Cities Climate Leadership Group (C40) in connecting more than 90 of the world's greatest cities, representing over 650 million people and one quarter of the global economy. Created and led by cities, C40 is focused on tackling climate change and driving urban action that reduces greenhouse gas emissions and climate risks, while increasing the health, wellbeing and economic opportunities of urban citizens.

InFocus Reports are given to the city in each region that produced the highest quality response for their submission to CDP Cities.

In 2016, five C40 cities are awarded with InFocus Reports for demonstrating leadership in their region by taking bold climate action. We congratulate: Cape Town, South Africa; Mexico City, Mexico; Paris, France; Sydney, Australia and Vancouver, Canada.

This year we also recognize cities that are disclosing for the first time in 2016 and received the highest score in each of their regions: Gladsaxe, Denmark; Municipalidad de Providencia, Chile; City of North Vancouver, Canada; Taoyuan City, Taiwan; and Yaoundé 6, Cameroon. This group of cities are excelling at disclosure in their first year of reporting, which is critical for taking meaningful action to address environmental risks.

With this report CDP, C40 and AECOM are proud to highlight Mexico City as a climate leader. This document contains the questionnaire data provided to CDP from Mexico City as part of its 2016 CDP submission.

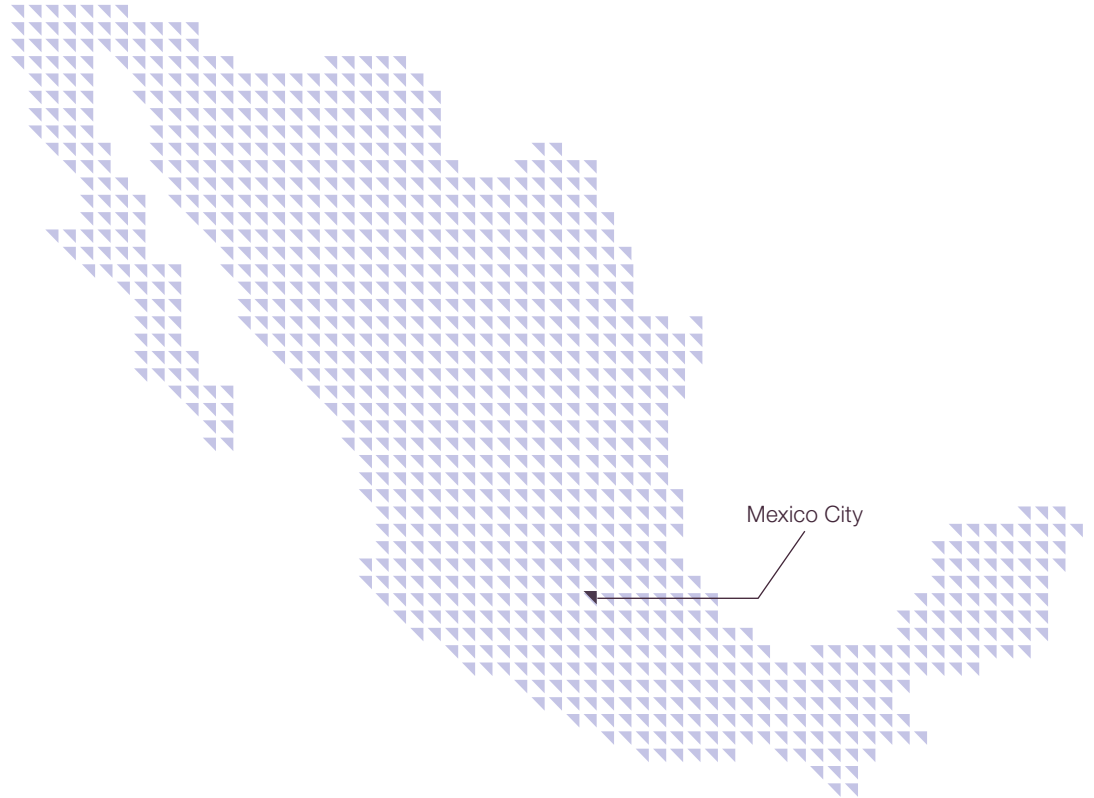

Mexico City, Mexico

4

Years disclosing to CDP

Population

8,874,724

CDP is one of the official reporting platforms supporting the Compact of Mayors, which has now merged with the EU's Covenant of Mayors to create the Global Covenant of Mayors for Climate & Energy

Compact of Mayors

Phases completed

Mitigation

Climate Action Plan

Programa de Acción Climática de la Ciudad de México 2014 - 2020 | 2014

Emissions protocol

Global Protocol for Community-Scale Greenhouse Gas Emissions Inventories (GPC), (WRI, C40 and ICLEI)

12

activities being
undertaken to
reduce emissions

Top 3 emissions reduction activities

Private transport

Transportation demand management

Mass transit

Improve bus, rail, metro, and tram infrastructure, services and operations

Outdoor lighting

LED / CFL / other luminaire technologies

Energy mix

Climate hazards

Vulnerability assessment

Survey on vulnerability analyses available in Mexico City: Establishment of a Base Line for the Mexico City Climate Action Program 2014-2020 | 2013

Climate hazards are dangerous climate-related physical events that may cause loss of life, injury, or other health impacts.

These hazards can cause damage or loss to infrastructure, livelihoods, and environmental resources.

Top 3 climate hazards by timescale

Current

Heat wave

Flash/surface flood

Short-term (by 2025)

Forest fire

Vector-borne disease

Top 3 assets / services affected by climate hazards

Health and community

Emergency services

Food and agriculture

Adaptation

4

actions are being undertaken to reduce risk from climate hazards

Adaptation Plan

Estrategia Local de Acción Climática de la Ciudad de México 2014-2020 | 2014

Adaptation actions taken for the top climate hazards

Vector-borne disease

Testing/vaccination programs for vector-borne disease

Flash/surface flood

Crisis management including warning and evacuation systems

Forest fire

Hazard resistant infrastructure design and construction

Adaptation actions taken to reduce water supply risks, by timescale

Current

Flooding

Municipal water efficiency retrofits / investment in existing water supply infrastructure

Increased water stress or scarcity

Awareness and education / conservation and incentives / efficiency retrofits
